Non-GAAP Disclosure

In addition to the GAAP results provided in this release, the company provides certain non-GAAP financial measures that are not in accordance with, or alternatives for, generally accepted accounting principles in the United States. Our non-GAAP financial measures of non-GAAP general and administrative expenses (G&A), non-GAAP operating income, non-GAAP operating income growth, non-GAAP operating margin, non-GAAP effective tax rate and non-GAAP earnings per share exclude the below-listed items and their related tax impacts, as they do not contribute to a meaningful evaluation of the company's future operating performance or comparisons to the company's past operating performance. The GAAP measures most directly comparable to non-GAAP G&A, non-GAAP operating income, non-GAAP operating income growth, non-GAAP operating margin, non-GAAP effective tax rate and non-GAAP earnings per share are general and administrative expenses, operating income, operating income growth, operating margin, effective tax rate and diluted net earnings per share, respectively.

<u>Non-GAAP Exclusion</u>	<u>Rationale</u>
Restructuring and impairment costs	Management excludes restructuring and impairment costs for reasons discussed above. These expenses are anticipated to be completed within a finite period of time.
Transaction and integration-related costs	Management excludes transaction and integration costs, primarily amortization, of the acquired intangible assets for reasons discussed above. Additionally, we incur certain costs associated with certain divestiture activities. The majority of these costs will be recognized over a finite period of time.
Gain on sale of assets	Management excludes the gain related to the sale of assets to Nestlé, primarily consisting of intellectual properties associated with the Seattle's Best Coffee brand, as these items do not reflect future gains or tax impacts for reasons discussed above.
Sale of certain joint venture operations and retail operations	Management excludes the gain or loss, and subsequent adjustments, if any, related to the sale of certain joint venture and retail operations as these activities were specific to the sale and for reasons discussed above.

Non-GAAP G&A, non-GAAP operating income, non-GAAP operating income growth, non-GAAP operating margin, non-GAAP effective tax rate and non-GAAP earnings per share may have limitations as analytical tools. These measures should not be considered in isolation or as a substitute for analysis of the company's results as reported under GAAP. Other companies may calculate these non-GAAP financial measures differently than the company does, limiting the usefulness of those measures for comparative purposes.
